Maxwell B. Smith

Philadelphia, PA | maxwell.bsmith0@gmail.com | 609 - 477 - 9664

Github | Personal Website | Linkedin

Driven individual with six years of experience in a fast paced and demanding work environment. Seeking a position in software development, with a company that values continued learning and inclusivity, where I can further develop my skills while being challenged to think creatively, learn new technology, and make an impact.

Technical Skills

- Java • HTML • CSS • JavaScript • Unit Testing • JSON • IntelliJ • React
- Vue.js • Version Control (Git) • Responsive Design • PostgreSQL • Spring Boot

Education

Tech Elevator - *Philadelphia, PA*   *2022*

Learned to create dynamic web-based software systems using Java in a 14-week full-stack coding bootcamp, including 700+ hours of developmental education and application.

Stockton University - *Galloway, NJ*   *2018 - 2020*

Completed three years geared toward studies in philosophy and studio art.
Spent time taking classes that aligned with my personal goals for self-growth.

Technical Experience

Pothole Tracking Web App -

Mob programmed a dynamic full-stack web application for tracking potholes following an Agile approach. Wrote a RESTful API server using OOP in IntelliJ and tested in Postman, and a front-end client using Vue.js in VS Code.

Venmo mimic App -

Pair programmed a RESTful API server and command line application using Java and SQL to mimic the functionality of Venmo.

Vending Machine App -

Created a command line app using OOP to emulate a vending machine. Project followed a MVC design and was completed with pair programming using Java.

Professional Experience

Bright Stars Gymnastics Academy - *Egg Harbor Township, NJ*   *2016 - 2021*

- Coached the top recreational gymnastics classes in the area
- Influenced all gym classes by creating new drills and sharing the ideas that made my own classes so successful
- Oversaw facility programs to ensure that our team was prepared to provide quality
- Assisted the customer service team to increase the fluidity of gym processes
